Beyond Compassion: Caring for Women with a History of Trauma

- Trauma is associated with increased HIV vulnerability, higher HIV incidence, faster disease progression & more hospitalizations.
- Unaddressed trauma is associated with twice the rate of death among women living with HIV.
- Violence and/or trauma rupture women's relationships with self, partners, family members & medical system.

Addressing trauma is necessary to support women living with or at risk of acquiring HIV.

Join us *live* for a discussion via **Google+ Hangouts on Air**:

Friday, October 28th, 2016
10am PT/12 noon CT/1pm ET

We will hear from our esteemed panel of women's care champions, including:

Dr. Carmen Landau, MD: Southwestern Women's Options
Jenee Johnson, CCPC: San Francisco Black Infant Health
Dr. Karen A. Scott, MD, FACOG: Sexual & Reproductive Health Epidemiologist
Karishma Oza, MPH: HIVE Program Coordinator
Kelly Costello, MSW: Homeless Prenatal Program
Shannon Weber, MSW: HIVE Director

Moderated by Yamini Oseguera-Bhatnagar
